

# Support Staff Spotlight!

## Learning Support Teacher ~ Mrs. Stasko

I have been the Learning Support Teacher (formerly called Resource) at TCS for about 15 years. I love to support students with unique challenges and I get to do that at TCS in a variety of ways:

- ♦ Arranging for access to targeted and specialized supports for students with differing levels of need
- ♦ Leading in the development, delivery and monitoring of educational programming for a child or student with significant learning needs requiring modified programming and those students requiring significant differentiation.
- ♦ Acting as a resource and learning support to classroom and subject area specialists supporting a diverse range of learners.
- ♦ Administering standardized assessments and making informal observations of students identified as needing extra support.
- ♦ Supporting the learning needs of students through individual and small group interventions.
- ♦ Coordinating educational assistants (in partnership with administration) to provide individual and classroom supports where needed.

It is a pleasure to work with all students and to have the opportunity to impact their individual learning needs and to live out our mission to lead children to be the best they can be for God's glory.
