

Becoming a Game Changer!

Train up a child in the way he should go; even when he is old he will not depart from it. Proverbs 22:6

November Focus: Justice

We find ourselves in November - the month that we specifically set aside to remember and thank our veterans and active people in service. These men and women are fantastic examples to our young Trinity students of what being a **justice-seeker** looks like. Pastor Jerry Dykstra, in his aptly named devotion "Justice", explains why the church (and our small school community) must embrace our call to be the voice for the voiceless.

"The church is more than a gathering of worshipers. The church must reach beyond itself into all of God's creation. It is called to be the voice of the poor and powerless--the witness to justice and righteousness in a world ruled by power and wealth. Throughout history God has raised up prophets to proclaim a message otherwise silenced by apathy and greed... God is concerned that his people live out their relationship with him in ways that bring righteousness and redemption to the world. Being the church is about the life-changing impact that Christians have seven days a week, 365 days a year, year in and year out. The church must promote God's kingdom and his righteousness."
